

GVN.WORLD

Powered by **GLOBAL VENTURE NETWORK** (GVN)

About Us

Over the span of more than a decade, GVN has dedicated resources to advancing technology and fostering robust partnerships with liquidity providers. This strategic focus enables us to consistently offer narrow spreads across diverse market conditions.

GVN consistently diversifying its crypto selection and expanding its network of distributors, which grows steadily every day. The company is committed to empowering its members with the chance to live life on their own terms, promoting financial independence as its guiding motto.

Vision And Mission

GVN is dedicated to connecting people globally and empowering millions by offering financial assistance.

We believe everyone deserves a better life, and we're here to make it happen with our innovative binarical matrix program.

What is Smart Contract?

A smart contract is a protocol that is self-executing and self-enforcing, operating according to its predetermined terms and conditions. It utilizes blockchain technology to store and execute contractual clauses securely. Leveraging Bianance Blockchain Technology, we've established a business with unparalleled transparency, thanks to the implementation of smart contract technology!

Discover World's smart contracts are public and accessible for anyone to view directly on the blockchain! Crucially, they are immutable, meaning they cannot be altered once deployed. Discover World proudly holds the title of being the top BNB smart contract provider, excelling in programming, marketing, and fostering a vibrant community!

Blockchain Technology

- **Smart Contract :**

We're diligently crafting a USDT (BEP-20) distributed network powered by smart contracts, utilizing advanced coding techniques. This network is meticulously deployed on the Binance Blockchain, ensuring reliability and security for all transactions.

- **Impossible to Hack :**

Smartcontractsare placedon an immutable ledger called the blockchain, which is extremely difficult to hack.

- **Exceptional Support :**

Ourteamisdedicatedtohelpingyou achieve the most from the skills.

Why Choose VST?

- "There are many exciting networks, but not all of them are popular enough or well-developed.
- We chose **VST** (Binance Smart Chain) for several reasons."

Decentralization

What does '**Decentralized**' mean? What are its advantages and benefits? Decentralized marketing uses automated contracts to offer maximum **security and sustainability**.

A smart contract is an automatic execution algorithm on the BNB blockchain, one of the top cryptocurrencies. Like cryptocurrencies, smart contracts are decentralized and operate strictly according to their underlying code without the possibility of altering the defined execution.

The contract logic is encoded on the blockchain, with calculations performed by millions of computers worldwide. This ensures that the smart contract cannot be hacked or halted, securing the project.

Our Awesome Services

SAFE & SECURE

We Wants To Serve
People with its Fast and
Secure Platform.

Our team of skilled
professional is at your
service to help you with
anything, from basic to
advanced help.

BEST TEAM

HIGHLY PROFITABLE

Earn more profit than
other investment methods,
Ensure the legality of the
investment method.

Least expected to
fluctuate in price
a over short period of
time.

CONSISTENCY

Venture Share Token (VST)

DEFISYSTEM (DECENTRALISED FINANCE)

- ✓ **Token Name** : Venture Share Token (VST)
- ✓ **Total Supply** : 100 Million Only
- ✓ **Blockchain** : BEP 20
- ✓ **Token Pair** : USDT
- ✓ **Launching Price** : 1\$

4 Types of Income

1
